INTRODUCTION

The Montana Department of Fish, Wildlife and Parks owns and manages lands valued by anglers, hunters, outdoor enthusiast and other recreationists, both from Montana and throughout the United States.

The Department has secured interest in key properties in order to provide public access to lakes, streams and rivers, to preserve Montana's natural resources, and to provide important wildlife habitat. These properties offer numerous recreational opportunities to the public.

The LANDBOOK has been produced nearly every two years since 1956 to furnish detailed information about all lands owned and managed by the Department. In addition, programs have been developed to facilitate the recall of data and to produce specialized reports about the Department lands.

Site information in this book is grouped by Regions 1 - 7 and Region 9; the Region 9 section includes only those sites directly controlled by Headquarters. Sites are listed alphabetically within each region. Each site listing includes a total of acreage for that site. A regional total of acres is included at the end of each region's section. Statewide totals are found in the appendices.

The LANDBOOK includes a number of features and appendices. A site/region index is included to facilitate location of site information within the main body of the Inventory. A list of sites in order of township, range and section is provided at the end of the book. (Many sites are in more than one township and range, and include more than one section; these sites will, therefore, show up in this index more than once.) More detailed information and complete site legal descriptions are available from the Land Section.

This land book is deemed to be accurate based on the information available to us as of 12/31/06. The Land Section can't warrant its absolute validity. Some of the figures in this book may be approximations.

Should you have any questions, please contact James Colegrove - Land Section at 444-3974.

MONTANA FISH, WILDLIFE AND PARKS
2007 LANDBOOK

TAX PAYMENTS MADE BY
THE DEPARTMENT OF FISH, WILDLIFE AND PARKS

In accordance with state law 87-1-603 MCA, the Department of Fish, Wildlife and Parks is required to make payments to counties on all of the land it owns, except for real property taxes on bird farms, hatcheries or park sites. The Department is not required to make payments on real property in counties in which it owns less than 100 acres.

The Department has been required to make these payments since 1951. Original legislation was enacted at that time because it was felt that the lands owned by FWP were not of benefit to the general public, but rather to sportsmen only. Therefore, the Department was required to make the payments in order to minimize the impact of Fish, Wildlife & Parks' land ownership.

Since 1953, this statute has required that these payments be made "in a sum equal to the amount of taxes which would be payable on county assessment of the property were it taxable to a private citizen."¹ The methods used by the counties to determine the value of the property, and the tax rates and the mill levies applied are identical to those used to assess private landowners. The money is used by the counties for schools, roads, fire protection, weed control, soil and water conservation and administrative purposes. Rural and special improvement districts charges are also paid.

For those lands supported by license dollars, these payments are made indirectly by sportsmen through the purchase of hunting and fishing licenses. Federal Aid participates in tax funding on many wildlife sites. Although hatcheries, bird farms, and park lands are considered exempt from taxes, payments are made on assessments for rural and special improvement districts and other county services not considered taxes. Payments on park sites are made with coal tax dollars.

Today, the Department makes payments on land in thirty-eight counties. In FY2006, approximately \$455,736.00 in payments were made to Montana counties.

The following table shows the tax payments made by the Department for the past ten years.
